

# The first medical centre in Australia to be *Healthy Building* certified.

When Better Medical were seeking to apply world leading air purification technology to their newly constructed, Better Medical Clinic in Mount Barker, they looked no further than **Plasma Shield**.

The Clinic became the **first** medical facility and **second** building in Australia to obtain the **UL verification** mark as a Healthy Building for Indoor Air.

The UL mark, recognised internationally by LEED and WELL rating systems would not have been possible without **Plasma Shield**.

The clinic achieved a **7-fold improvement** in indoor air quality compared to the Australian Standard AS 1668.2

These results were independently proven by Flinders University who demonstrated that there was a reduction in virus like particles by **65%** and total microbial load by approximately **60%**.

*Note: UL refers to Underwriters Laboratories, a globally recognised regulatory body, and its Healthy Building program is an esteemed framework for assessing and verifying the health standards of buildings.*

Click this link to learn more from the Better Medical team.- [PlasmaShield –Air Treatment System](#).

*"Installing the system means this clinic has arguably the highest air quality of any GP practice in the world."*

Jeremy Stones - Better Medical CEO

## SECTOR

Healthcare

## LOCATION

Mount Barker, South Australia

## PROJECT SIZE

700 square meters

## CUSTOMER CHALLENGE

IAQ improvement- Reduced risk of airborne pathogens for patients and staff

## SOLUTION

The air treatment resulted in a 7-fold improvement in indoor air quality compared to the Australian Standard AS 1668.2

## CERTIFIED RESULTS

- UL Verification Mark
- Reduction in virus-like particles by **65%** and total microbial load by approximately **60%**

**Better Medical**
